

About ENCODE-IT

ENCODE-IT brings together organizations from Türkiye, Portugal and Belgium to support women with limited digital skills. The project offers coding education, mentorship and international collaboration through accessible, inclusive learning formats.

What Is It About?

With the help of interactive modules, virtual training, and a global perspective, ENCODE-IT aims to bridge the digital divide and support the EU's vision for a more inclusive and skilled society.

Empowering Women Through Coding and Digital Skills

ENCODE-IT is an Erasmus+ project designed to equip low-skilled women with the tools and confidence to enter the digital workforce. Through beginner-friendly training and hands-on learning, we're opening doors to economic independence and equal opportunities.

Everyone Deserves a Digital Future

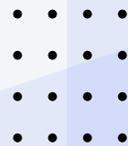

ENCODE-IT PROJECT

ENCODE-IT is co-funded by the Erasmus+ KA210-ADU programme, supporting innovative small-scale partnerships in adult education across Europe.

Led by APPIS with partners IGEA and SDSN, the project focuses on promoting digital skills and social inclusion for women who are often left out of the digital world.

Together, we are building a stronger, more inclusive Europe, one line of code at a time.

PROJECT ACTIVITIES

Interactive Coding Modules 01

Six multilingual online modules designed for beginners, introducing essential digital and coding skills with a focus on Python.

Virtual Bootcamp 02

A 4-month online training experience offering real-time support, mentorship and hands-on learning opportunities for all participants.

International Hackathon 03

A collaborative event bringing together women from different countries to co-create digital solutions for real-world social challenges.

OUR VISION

ENCODE-IT envisions a future where all women, regardless of background, can access the digital skills they need to succeed.
